

S-pushTAN procedure using Apple iOS

Quick reference for users switching from smsTAN or chipTAN

Note: First install the S-pushTAN App as well the Sparkasse App on your iPhone/iPad.
The figures may slightly differ

Download pushTAN-App

Setup of the S-pushTAN App

Step 1

- Start the **S-PushTAN App** on your iPhone/iPad.
- You are requested to file a password for the access.
- The password must comprise at least 8 characters (composed of numbers, letters and one special character).

Example: **werder+1**

Step 2

- Scan the QR code from the registration letter.
- Shortly after, you will get the activation code.

Step 4

- Enter the activation code transmitted via the S-pushTAN App and operate the „Weiter“ (continue) button in order to complete the activation.

Step 5

- Then you receive, via the S-pushTAN App, the information that the activation of the S-pushTAN connection has been successfully completed.

Step 3

- In the next step, you open the start page of Sparkasse Bremen on your PC and enter your **login name/leg.-ID** and the **PIN** in the login area for online banking.
- Click on **„Login“**

Stark. Fair. Hanseatisch.

Setup of the Sparkasse App

Step 6

- Just like for the S-pushTAN App, there must be filed a password in the initial registration.
- We recommend to activate the request regarding individual offers that follows.

Step 7

- Enter the BLZ (bank Code) **29050101** of Sparkasse Bremen.
- Then tap on the „+“ add account and then on bank account.

Step 8

- Enter your login name/leg. ID and operate the „Weiter“. (continue) button.
- Then enter your PIN.
- We recommend not to save the PIN.

Note: In Order to use Online Banking via iPhone or iPad, you still need to set up the Sparkasse App.

Step 9

- There is built-up a connection to the server of Sparkasse and your accounts are retrieved.
- The accounts displayed in the Sparkasse App are taken over.

Step 10

- Note: For a direct transmission of the TAN from the S-pushTAN App, you can set the „Automatische Sperrzeit“ (automatic blocking time) under „Einstellungen“ (Settings) so that the password does not need to be entered again during this period.
- After the refresh has been completed, you can inspect all transactions (postings) and effect transactions.

Note: If you already administer your accounts via the Sparkasse App using the smsTAN or chipTAN procedure, you still must do the following:

Tap on one of the accounts displayed so that you can see individual transactions. Via account details (on the bottom right), you get to the menu item „TAN-Verfahren (pushTAN)“. Tap on the menu item and update the TAN medium. Now you can use all transaction via both, the **Website of Sparkasse** and the **Sparkasse App**.
